

DESCRIPTIVE FORM FOR A POST-DOCTORAL INTERNSHIP

(The projects must conform to the Research Topics scientific planning, and therefore, prior to the project, dialogue must take place between the RT leader concerned and the internship team. However, it does not seem necessary at the moment to overburden the post-doc files with a series of opinions from all the managers concerned. Each file will be referred to the internship committee by the department in charge, which will point out any potential discrepancies in terms of planning.)

PROPOSED RESEARCH SUBJECT

Title:

- Work topic - *Concise definition (use the attached page for a detailed description):*

- Liaison with other teams (internal and external)

- Foreign placement planned during the post-doctoral internship (if yes, specify duration and place)

- Scientific and technical production planned during the post-doctoral placement (describe this production, specifying not just its nature but also, for publications, the journals in mind and the precise topic of the articles)

DESIRED PROFILE OF CANDIDATE – Concise definition

PRACTICAL CONDITIONS OF POST-DOCTORAL INTERNSHIP

- Duration (in months) and period:
- Planned operational budget:
- **Other funding source (co-funding)** (*compulsory declaration*):
- Gross monthly remuneration: ~~€2852~~ **2,150**
